Communication Of Additional Information

Additional material, new information and notifications of course changes will be posted on Blackboard. Blackboard is an important virtual learning environment for this course. Students doing CRIM 216 will be expected to engage and participate on Blackboard. You will automatically receive all Blackboard announcements as an email sent to your @myvuw.ac.nz email address. If you are not going to use this Victoria email address set up for you, we strongly encourage you to set a forward from the Victoria email system to the email address you do use.

Prescription

This course will examine the place of drugs, alcohol and crime in contemporary society by critically exploring the socially constructed boundaries between use and misuse, the separation between licit and illicit use; and the links between drugs/alcohol and crime.

Course Content

Key themes addressed on this course include: the bifurcation of substance use, the contested relationship between substance use and crime, and the legal and policy framework for policing, treating and managing misuse. Through readings, lectures, tutorials and online sources, students will be equipped to critically understand and assess the nature, extent and control of drug and alcohol related crime.

The use of drugs is a ubiquitous feature across human societies, both cross-culturally and historically, despite this the manufacture, sale, distribution and use of certain drugs have without any clear scientific evidence base, been often subject to punitive, criminal sanctions. Certain drugs have been strongly associated with degeneration, violence, organized crime,

theft, and other types of criminal activity. However, the misuse of both licit and illicit drugs is a major social, legal and health issue in modern societies, responsible for significant amounts of harm. This course will explore to what extent criminal behavior is caused by the drugs, or caused by the measures used to manage and control drugs.

The central aim of this course is to equip students with a good understanding of nature and context of legal and illicit drug use and drug misuse in society and to explore the complex and contested relationship between drug use and crime.

Course learning objectives (CLOs)

Students who pass this course should be able to:

1. Describe and evaluate New Zealand law governing the management and control of drug and alcohol use and misuse.
2. Explain the social construction of use and misuse of substances and the bifurcation process between licit and illicit use.
3. Understand and evaluate the contested and complex relationship between drugs, alcohol and crime.
4. Critically examine criminal justice strategies used to manage and control drug and alcohol related crime.
5. Critically analyse political debate concerning drugs, alcohol and crime.

Teaching Format

This course involves face-to-face as well as online learning and combines lectures and seminars in a format designed to facilitate student learning and importantly interaction. Each lecture will normally involve a combination of lecturing, class discussion, in-class activities supplemented by the video, PowerPoint/Prezi presentations, course papers, the online magazine [Drugs, Society and Human Rights](http://www.scoop.it/t/drugs-society) (<http://www.scoop.it/t/drugs-society>) and the Blackboard virtual learning environment (VLE). Blackboard discussion is intended to build on the material presented in the lecture and on the course reading for that week.

It is imperative that all students come to lectures having previously read the required material for that week, and that students are prepared and able to enter into class discussions. Following each lecture additional material will be made available on Blackboard. The VLE will also be used to continue some of the issues and debates that emerge from the lecture discussion

The **tutorials** are a key component of the learning process to consolidate learning by providing opportunity for further discussion within the smaller group. Tutorials are not lectures so do come prepared to: engage in small group discussions; make presentations; raise questions; and explore issues raised by the previous lecture material or set reading. An effective tutorial requires a group of students who are willing to engage and contribute.

Mandatory Course Requirements

In addition to achieving an overall pass mark of 50%, students must (unless prevented by illness or other unforeseen reasonable cause):

- Attend at least seven of the nine tutorials (that run during week 2-6 and weeks 8-11 inclusive),
- Submit assessment 1 and assessment 2, and
- Sit assessment 3 (a 20 question test).

Although not a mandatory requirement students are strongly advised to attend every lecture and arrive at lectures having completed the reading for that week.

Workload

The expectations are that students will work 10 hours per point, therefore this 20-point course equates to 200 hours study over the trimester. This includes scheduled contact time, individual or group study, and work on assessment tasks.

In addition to attending lectures (24 hours for the trimester) and tutorials (7-9 hours) students can be expect to spend approximately 50 hours throughout the course on essential reading, 30 hours preparing for case study assessment, 40 hours preparing for the assignment and 50 hours preparing for the tests.

Assessment

All three assessments will be available on Blackboard by week two

Assessment items and workload per item	%	CLO(s)	Submission Deadline
1 <u>Assessment 1</u> Case studies: Exploring the MDA 1975. 1,500 words	20%	1	Mon 11th Aug (wk.5) 9am via Blackboard
2 <u>Assessment 2</u> 2,000 word assignment	30%	2	Mon 15 th Sept (wk. 8) 9am via Blackboard
3 <u>Assessment 3</u> 20 questions test (divided into two halves part one handed in online in week 10 and part two sat in class in week 12)	50% (2 x 25%)	3,4,5	Part 1. Mon 29 th Sept (wk.10) 9am via Blackboard Part 2. Fri 17 th Oct (wk.12) in class

Four key areas are considered when marking your assignments:

1. The content of your work is relevant to and answers the set question.
2. The structure, coherence and approach are academic.
3. The quality of source material used and evidence base of your arguments are reliable, carefully considered and evidence based.
4. The style, presentation and referencing reflects university requirements.

Submission and return of work

All assignments should be typed and electronically submitted. The Institute insists on a high standard of written work from students. You should therefore ensure that there are no spelling or grammatical errors in your assignments, that work is appropriately attributed to authors, and that references are accurately cited. **Careful proof-reading of assignments is essential.** Failure to meet these standards will result in the deduction of marks.

Assessment one and two will be submitted electronically via Blackboard **and returned via your Blackboard email address.** The results of assessment three (the class test) will be returned via your Blackboard email address. However, your overall grade for CRIM 216 will be available electronically via 'My Victoria'.

Penalties

All assessed work must be submitted by the specified date. You are expected to keep to these deadlines otherwise it is unfair to other students. Extensions will only be granted in **unforeseen exceptional** circumstances, and must be sought from Julian Buchanan

Julian.buchanan@vuw.ac.nz **prior** to the deadline. An example of an unforeseen exceptional circumstance would be illness confirmed by a letter from a medical practitioner. Please note that **a lack of prior organisation, other commitments and/or computer failures are not valid reasons for an extension.**

The word limit for each assessment can only be exceeded by a maximum of up to 10%. Any words submitted beyond the 10% limit will not be assessed.

Late submission of work **without an authorised extension** will be penalised by the following deductions:

- One grade = Period up to and including 24 hours past due date.
- Two grades = Period from 24 hours up to and including 72 hours past due date.
- FAIL = All work handed in later than 72 hours (3 days)

Practicum/placement/field trip/internship arrangements

There are no other arrangements for this course.
